

XENONLIGHT Mahogany Dyed Black, Stainless Steel Cable, Aluminum, Concrete, LED Lights 12l x 12d x 36h

The Xenon/Light pedestal takes the Xenon pedestal to a whole new dimension. One LED light fixture illuminates a frosted glass insert on the top of the piece, while another provides a ground halo below. The transformer and wiring are artfully integrated into the piece with the cord and switch as the only visible components. This is the perfect piece to display glass art.
